PADEL TURF INNOVATION

**FIBRILLATED
GRASS
FIBERS**

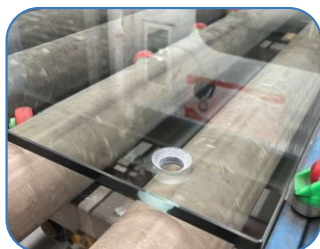

**STRAIGHT
MONOFILAMENT
FIBERS**

**TEXTURED
FIBERS**

Thanks To Many Years of Production Experience in the Artificial Turf Industry, Padel Turf Has Been Continuously Upgraded, The Grass Fibers are More wear-Resistant, the Ball Has Good Rebound Performance, and it Causes Minimal Damage to Athletes Knees.

PADEL GLASS OTHER OPTIONS ALSO AVAILABLE

**12MM
TEMPERED
GLASS**

We Insist on Using High-Quality Tempered Glass Produced By Famous Brand Factories, With CE Certification and Test Reports Provided By Tuv. Adhering to Market Orientation, We Continue to Develop and use Laminated Glass and PC Boards to Replace Traditional Tempered Glass to Improve the safety of Padel Court.

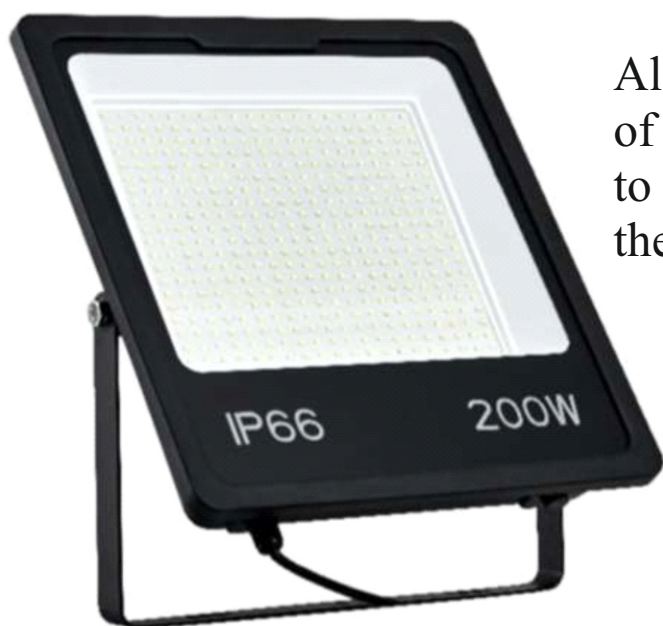

LED LIGHT

All of our padel tennis courts have been upgraded to LED lights, all aluminum alloy shell, good heat dissipation effect, longer service life, more reasonable lighting design, to ensure that athletes' eyes are not hurt.

LIGHT

System Power : 300W Light
Lux 400
Performance Water Proof Ip67

All wires pass through the inside of the tube, not directly exposed to the outdoor environment, and the service life is longer

LIGHT

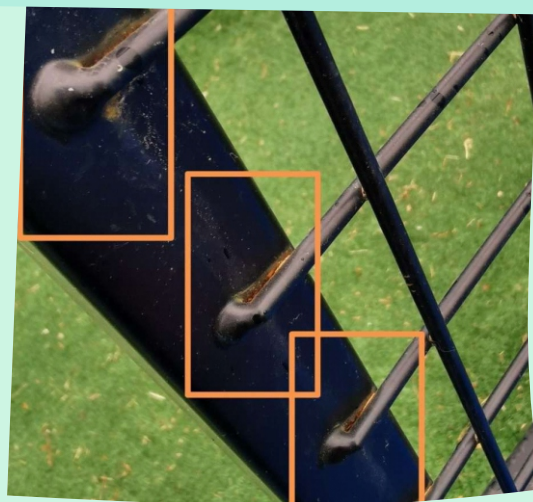

System Power : 200W Light
Lux 300
Performance Water Proof Ip66

TENNIS POST

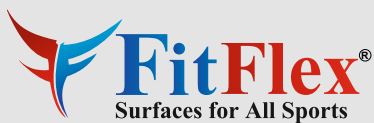

The bottom flange of the tennis column has six fixing holes, which are fixed on the ground with M12*16MM chemical anchor bolts, which are more stable than four-hole fixing.

Welding must not leave gaps. Once a gap is left, it is difficult for hot-dip galvanized zinc liquid and interpon powder coating to enter the gap and can not be completely closed. In a short period of time, the cracks will rust.
